

MA 330 ESSAY # 6

Much of the mathematics that we have discussed in this class has been the work of single individuals. In the 21st century, however, mathematics has become an intensely collaborative discipline. In what ways did communication and collaboration on mathematical projects change during the Late Modern period? You may want to discuss the epistolary correspondence of Gauss, the collaboration of Lovelace and Babbage, or the emerging global community of mathematics in the time of Hilbert. Be sure to provide evidence in support of your conclusions.

Your essay should be typed, double spaced, 12 pt Times New Roman font, at least 750 words.
