

MA341 Project #1 Additional Comments

1. I realize that you will not have time to present everything in your project during class time (15 minutes is not long!), but you should *at least* plan to hand out to the class the problem examples for each grade level. Include in these hand-outs statements of the relevant NCTM standards that your problems address. What you give me will probably be lengthier, of course.
2. If you haven't talked to Kathryn McLaughlin or Georgia Ringo about your projects, please do so, just to get some feedback about the levels and types of problems you are choosing.
3. Presentations will take place on Monday, November 5, and Wednesday, November 7.
