

MonocleCAT will be used in this course

This class will be using the MonocleCAT (monocle Computer Assisted Teaching) tool throughout the semester. MonocleCAT is a web-based system that allows immediate interactive feedback and graphical simulations, to both aid and assess understanding of the course material.

MonocleCAT feedback, questions and simulations are launched on demand by the professor during class. Students can participate using their laptops, iPods, smartphones, and cell-phones. MonocleCAT questions, simulations and answers can also be reviewed by the student throughout the semester should they be made available by the professor.

MonocleCAT is licensed by student subscription, with unlimited courses per student. (A student can access all of their courses using the system throughout the subscription term, with a single subscription.)

Subscription keys are available at the university bookstore or directly on the Top Hat Monocle website at <http://www.tophatmonocle.com/register/>

A student subscription can be obtained for:

\$20.00 for 4 months (slightly higher at the bookstore)

\$38.00 for 5 years (slightly higher at the bookstore)

Technical Requirements:

All features enabled	Laptop (PC or Mac)
	Web browser (Firefox 3.0+ recommended)
	Javascript
Answer questions and discussion	Smartphone via mobile browser
Answer questions and discussion	Cellphone via text messaging
