

Mary likes John better than  
Adam and even better than George.

However, John loves Jessica more than  
Elizabeth and more than Mary.

But Jessica loves Adam more than George than John.

Alas, George likes Elizabeth more than Mary more than Jessica.

Elizabeth likes Adam more than George and she cannot stand John.

And yet, Adam adores Mary more than Jessica and more than Elizabeth.

Can you match them up,  
so no two people  
will break up with their spouses  
and elope together?

If you are curious,  
take Math 415/CS 415  
in Fall 2009.
