

Portfolio Guidelines

At each exam, you will submit nicely written proofs to all theorems completed for the Daily Homeworks thus far. (No scratch work!)

- Make sure each theorem is stated clearly before writing the proof to that theorem.
- If you have done a perfect job on a Daily Homework, you can insert that page directly. If those needed editing, but then were written nicely and correctly in a Weekly Homework, you can directly include that Weekly Homework. Any problems that still need editing should be rewritten and added to the portfolio.
- Portfolios will be graded on completeness and clarity. The goal is for you to have a complete and organized collection of your work.
