

UNIVERSITY OF KENTUCKY
Math Movie of the Month
presents:

N
is a
Number

**A portrait of
Paul Erdős**

by George Csicsery

“A man with no home and no job, Paul Erdős was the most prolific mathematician who ever lived. Universally revered among mathematicians, Erdős, who was born in Hungary in 1913, was a wandering genius who eschewed the traditional trappings of success, dedicating himself instead to inventing new problems and searching for their solutions. He inspired generations of mathematicians throughout the world with his insightful approach and the wry humor with which he discusses politics, death, and the cosmic struggle to uncover proofs hidden by the most stubborn of adversaries - God.”
“N is a Number, a documentary filmed in England, Hungary, Poland and the United States over four years, presents Erdős’s mathematical quest in its personal and philosophical dimensions, and the tragic historical events that molded his life.” – 58 min

**Friday February 13th, 2009
7:30pm in Classroom Building 118**
