

**MA 614 – Homework 13**  
**Due Monday, Feb 14**

This homework is a short essay. You must type your homework in LaTeX. This essay should be 1-2 pages in length when using the amsart documentclass package at 11pt font. (You do not have to use this formatting, you may write the equivalent in a different format).

1. What has been the most *mathematically* challenging part of this class so far? What has been the *mathematically* easiest part of the class so far? Are there any topics you are struggling with? Where are you getting confused? What have been the most and least challenging parts of the class in general so far?
