

MA 614 – Homework 17
Due Wednesday, Feb 23

This homework is a short essay. It may be handwritten.

1. Choose a topic or theme we have discussed in this course and create a concept map for it. A *concept map* is a diagram showing the relationships among concepts. Type “concept map” into google and you will get many examples. The topic you choose should be rich enough that there are a plenty of branches on your map, but should not be so immense that your concept map does not fit on a page.
 - (a) Your concept map should be hand-drawn.
 - (b) Make sure to label the branches of your concept map so that it is clear how the different nodes of the map are related to each other. Again, the google search should make it clear what you are to do.
