Bibliography and Suggested Reading List

1. Abbott, Edwin A., *Flatland: A Romance of Many Dimensions*, New York: Dover, 1952.

2. Boyer, Carl B., *A History of Mathematics*, 2nd ed., New York: John Wiley and Sons, 1989.

3. Coxeter, H. S. M., *Regular Polytopes*, New York: Pitman, 1948.

4. Coxeter, H. S. M., *Introduction to Geometry*, New York: Wiley, 1969.

5. Cundy, H. Martyn and A. P. Rollett, *Mathematical Models*, 2nd ed., Oxford: Clavendon Press, 1961.

6. Gellert, W., M. Hellwich, H. Küstner, and H. Kästner, ed., *The VNR Concise Encyclopedia of Mathematics*, New York: Van Nostrand Reinhold Co., 1977.

7. Holden, Alan, *Shapes, Space, and Symmetry*, New York: Dover, 1991.

8. Kappraff, Jay, *Connections—The Geometric Bridge Between Art and Science*, New York: McGraw-Hill, 1991.

9. Senechal, Marjorie and George Fleck, *Shaping Space—A Polyhedral Approach*, Boston: Birkhäuser, 1988.

10. Wenniger, Magnus J., *Polyhedron Models*, Cambridge: University Press, 1971.
