

UNIVERSITY OF KENTUCKY

Math Movie of the Month
presents:

**“Chaos, Fractals
and Dynamics:
Computer
Experiments
in Mathematics”
Robert Devaney**

“Robert Devaney communicates his deep understanding as well as his enthusiasm for chaos, fractals, and dynamical systems. Illustrating the mathematics are forays into the colorful, unpredictable world of fractals and Julia sets. This film describes a current area of intense mathematical activity and the audience will appreciate this film for the clarity of exposition and the sheer beauty of the graphics.” — 60 min

**Friday October 10th, 2008
7:30pm in Classroom Building 118**
