

UNIVERSITY OF KENTUCKY

Math Movie of the Month
presents:

The Colors of Math

A documentary by

Ekaterina Eremenko

“Documentary filmmaker Ekaterina Eremenko is famous for unique, innovative documentaries. Her new film *Colors of Math* (The Russian title, – *Sensual Mathematics – is better*) is an intellectually stimulating and beautifully shot film invites us to look at mathematics from a new angle as the arena of the senses. To most people mathematics appears abstract, mysterious. Complicated. Inaccessible. But math is nothing but a language to express the world. Mathematics can be sensual. In this documentary, the beauty of mathematics, its sounds, colors, taste, and texture are revealed through the eyes of contemporary mathematical geniuses Cédric Villani, Aaditya V. Rangan, Jean-Michel Bismut, Günter Ziegler, Maxim Kontsevich, and Anatoly Fomenko.” – 60 min

Friday March 25, 2016

7:30pm in Classroom Building 122
