

- Homework H, #20 and 26 in §3.8. Due Wednesday, 10 April 2003. Please be sure that you use the tests discussed in lecture to explain how you know that you have found an absolute maximum or minimum. I will be particularly pleased by solutions that follow the procedure outlined in lecture or on page 231 of the textbook for solving such problems.
- The quiz on Thursday, 11 April 2003 will cover section 3.10, anti-derivatives.
- The third hour exam will be in CB 114 on Tuesday, 15 April 2003 from 7:30pm to 9:30pm. A review sheet will be handed out “soon”.
- The error of the week. Not working an optimization problem in lecture that used the method in box (8) on page 187 for finding the extreme value.
