

Fall 2017  
Calculus II  
MA 114:001-004

Russell Brown  
859 257 3470  
rbrown@uky.edu

*Office hours:* M 10-10:50am in Mathskeller, WF 9-9:50 in POT 723 and by appointment

*Lectures:* MWF 8-8:50 am CB 114. In addition, there are recitations on Tuesday and Thursday. You should plan to attend every class.

*Webpages:* Common web page: <http://www.math.uky.edu/~droyster/MA114F17/>  
Lecture web page: <http://www.math.uky.edu/~rbrown/courses/ma114.f.17/>

*Grading:* We will follow the grading guidelines in the common syllabus.

*Canvas:* Student grades will be recorded at Canvas. You may access Canvas at <http://uk.instructure.com/>.

Students need to create an account at iClicker Cloud (formerly Reef Polling) for this class. You will then need to add the class titled “MA 114 001-004, 8am lecture, Brown” to your account. This task can be accomplished through Canvas. We will take attendance in lecture through administering regular quizzes by iClicker Cloud. You will need a smart phone, tablet or laptop to do this. Please contact me if you are not able to bring a device to class. An announcement in Canvas gives more detail about creating an account.

*WeBWorK:* Students will submit much of their homework online through WeBWorK. You may access WeBWorK at <https://webwork.as.uky.edu/webwork2/MA114F17/>. Your login name for WeBWorK is your link blue id with the letters in CAPITALS. Your initial password will be your 8 digit student id number without the initial 9. Note that your WeBWorK password is independent of your link blue password. Students who registered late may not have an account and should contact Brown.

*Policies:* Students are allowed five excused absences from lecture without documentation. Students who miss a sixth lecture and want to receive credit must submit documentation showing that all six absences are excused. This documentation must be submitted within one week of the sixth absence.

Students who miss recitation and would like to request an excused absence should speak with their recitation leader within one week of the absence. Students with excused absences from lecture, exams or homework should contact Brown. In general, students who are travelling will be expected to complete WeBWorK by the due date in the syllabus.

All requests for re-grades of exams or quizzes should be submitted within one week of the date the assignment is returned to the class. To request a regrade on an exam, write your question about grading on the paper and return the paper to Brown or your TA to be reviewed by Brown.

Please make use of instructor office hours, the Mathskeller, and The Study. We are here to help.

*Two suggestions:* 1. Form a study group to work on the homework. The best way to learn mathematics is to solve problems with your fellow students. Make sure that you can explain the reasoning behind your solution to a colleague. 2. Review the material before you come to class. Math is challenging and we do not understand every detail after the first reading. If you have seen the main ideas, you will be prepared to develop a deeper understanding in lecture and recitation.
